Mr Shuey:

I received your voice mail as well. I checked the ADAMS document number and it is juxtaposed. It should read ML073540523 instead of what it currently reads. I have asked the Licensing Assistant to make the change on the web site. It should be corrected by tomorrow. For your convenience, I have attached the document. As for your inquire about an opportunity for public comment and hearing, a Federal Register Notice which asks for public comments and provides an opportunity for a hearing on the application for consent for an indirect change of control is in concurrence and should be published in the next several weeks. The construction you mention in your voice mail can only be the decommissioning activities that are currently ongoing including the finishing of the capping of the Cell 2 area and the placement of a flood protection channel. No new construction of buildings or a mill is taking place.

Dear Mr. McLaughlin,

We are interested in learning more about the application for indirect license transfer for the Rio Algom Ambrosia Lake (NM) uranium mill. ADAMS Document #ML073540253 is referenced on the NRC web site, but it can't be accessed because it's not highlighted. Our understanding is that this is the proposed acquisition of the RA mill site by Uranium Resources Inc. for the purpose of constructing a new uranium mill. We'd like to know more about the license transfer and opportunities for public comment and hearing. My contact information is below.

Thank you for your consideration,

Chris Shuey, MPH
