RE: USNRC License No. 07-00455-02

Dear Mr. Lawyer:

Enclosed please find the revised Appendix E: Experimental Station Radioactive Material Use/Storage Area Footprint for the Decommissioning Funding Plan for the DuPont Experimental Station located in Wilmington, Delaware. This revision corrects the typographical error that indicated the information presented in the table was for a different DuPont site.

Please feel free to contact me if you have any questions.

Sincerely,

Michael B. Ohm
Radiation Safety Officer
DuPont Experimental Station

APPENDIX E

Experimental Station Radioactive Material Use/Storage Area Footprint

Component	Number
Total Number of Areas	16
Chemical Fume Hoods	12
Glove Boxes	0
Other Ventilated Enclosures (i.e., biosafety cabinets)	4
Sinks	13
Sink Drains	13
Floor Drains	0
Lab Benches, linear feet	917
Total Area, ft ²	5,105
Appliances	5 refrigerators, 15 freezers; 2 incubators
Rad Waste Areas ^A	1 @ 60 ft ²

^A The radioactive waste area noted is a secure, decay-in-storage facility.
