

70-58

February 20, 1970

Files

I called Mr. Chennault on February 20, 1970, and inquired if a reply to this letter was expected in view of our letter of February 3, 1970, which apparently crossed this in the mail. Mr. Chennault explained that he had received our letter of February 3, 1970, and it had adequately resolved the questions raised in his letter of January 30 and that a separate reply to his January 30 letter was not required. He further stated that our contamination limits are available to him.
