**Reply to a Notice of Violation**

Docket No. 030-19652  
NRC License No.: 49-21004-01

This letter is in response to the NRC inspection of license no. 49-21004-01 and the notice of violation issued December 18, 2007.

Contrary to 10 CFR 20.1502(a), a staff technologist present during the inspection did not have his extremity monitoring device (ring badge) on him while handling radioactive materials. The violation occurred because the nuclear medicine technologist forgot the ring badge in his automobile. Corrective action included a management meeting to review the film badge policy with the employee. Postings have been placed in the nuclear medicine hot lab to remind all occupational worker to wear their personal monitoring devices. Hospital management will conduct spot checks of the nuclear medicine technologist to determine compliance with the personnel monitoring policy. Full compliance will be completed by January 30, 2008.

Sincerely,

Chris Smolik CEO Riverton Memorial Hospital

Dr. James Taylor RSO

Eric B Belk RT (R) (MR) Imaging Department Manager
