**Re: NRC License # 13-26261-01
Amendment to License (New Source addition)**

Dear Ms. Pelke,

CountryMark Cooperative, LLP (Refinery) is submitting this letter regarding the amendment of our existing NRC License # 13-26261-01. We would like to add a new specific source described as follows:

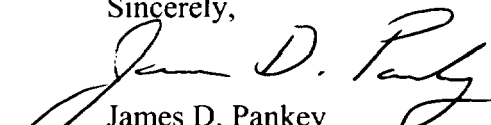

Model Number	Ohmart	A-2102 in an SHF1A source holder
Name of Equipment	Ohmart	200-LT-178 Vacuum Column Bottoms Level
Material	Cs-137	
Amount	50mCi	

Brief description This devise is a continuous level measurement transmitter. It will be installed on a Vacuum Column to measure the Asphalt level in the bottom of the column.

This would bring our total Cs-137 material on site to approximately 600mCi. Additionally, a brief phone discussion with Mr. Loren Hueter indicated a possible difference between our existing source information and the last inspection conducted. The inspection states CountryMark has an Ohmart SR-1A, however the license states we have an Ohmart 3460. To clarify the Ohmart, the model # is SR-1A, the serial number is 3460.

Please e-mail (pankey@countrymark.com) or call (812-838-8133) if you have any questions.

Sincerely,

James D. Pankey
Environmental Supervisor
