To: John Jankovich, Toney Kirkwood
Nuclear Regulatory Commission
Fax 301-415- 5369

From: Ron Siebert
Email: rsiebert@mctone.com

Pursuant to our recent phone conversation, I would like to request confirmation from you in a fax or email that to the best of your knowledge there have not been any changes in NRC regulations or guidance that would affect our Exempt Distribution and Materials license or our Device Registration Certificate. We presently use sealed C14 sources with less than 100 microcuries activity in our beta attenuation monitors. We sell our instruments to various state and federal agencies.

Regards,

Ron Siebert
