DOMINION VIRGINIA POWER
NORTH ANNA UNIT 3 COMBINED LICENSE APPLICATION
EARLY SITE PERMIT COL ACTION ITEM 13.6-1

On November 27, 2007, the NRC issued the Early Site Permit (ESP) for the Dominion Nuclear North Anna, LLC ESP site. On the same date, Dominion Virginia Power (Dominion) tendered the North Anna Unit 3 Combined License Application (COLA) to the NRC for review and approval. The North Anna Unit 3 COLA is currently under acceptance review by the NRC.

During that review, it was determined that additional information should be provided to address ESP COL Action Item 13.6-1. As a result, Dominion commits to revising COLA Part 2, Final Safety Analysis Report (FSAR), Section 13.6.

In the next revision of the FSAR, Dominion will add a paragraph to Section 13.6 to clarify that the general design requirements for protected area barriers are provided in the Physical Security Plan, and that the barriers will be designed and located to support the security response strategy timelines. The paragraph will also make a commitment to complete and implement the specific designs prior to fuel receipt.

Please contact Gina Borsh at (804) 273-2247 (regina.borsh@dom.com) if you have any questions.

Very truly yours,

Eugene S. Grecheck

Commitments made in this letter:

1. Revise FSAR Section 13.6 in next COLA submission as described in this letter.
