**TO: Bill Reichhold
Materials and Licensing**

**RE: Control Number 316063
Nuclear Cardiac Imaging**

Dear Mr. Reichhold,

This letter is in response to your fax dated January 22, 2008 regarding additional information about our NRC license amendment for the change of the Radiation Safety Officer from Jim Botti to Laura Luna. Your questions and the responses are listed below. **Please send all correspondence to Nuclear Cardiac Imaging, 3303 Dobson Dr., Bay City, MI, 48706.**

1. Applicants usually submit a certificate of completion to show they successfully completed the required classroom and lab training.

The classroom and lab training was a combination of my schooling for nuclear medicine technology and on the job training. I have no certificates.

2. Please submit the "supervising individual" information for the work experience received at Regional Medical Imaging.

All supervised work experience was duplicated at National Diagnostic Services to which my preceptor has attested to. Only this supervised work experience should be used.

3. Please specify what licensed material was used under the "Description of Experience", Item b, on the Radiation Safety Officer Training and Experience for Proposed Radiation Safety Officer 313A Form.

This is for use of 35.100 and 35.200. My signature below states this information is complete and accurate.

Please contact Jim Botti (734-662-3197) or our consulting physicist, Laura Luna, (734-662-3197) if you have any additional questions.

Sincerely,

A handwritten signature in black ink, appearing to read "J. Botti", written over a horizontal line.

James M. Botti, M.S.
Radiation Safety Officer
Nuclear Cardiac Imaging
