JAN 22 2008

Chad J. Burnett
Radiation Safety Officer
Mead Johnson & Company (T-24).
2400 West Lloyd Expressway
Evansville, IN 47721

Dear Mr. Burnett:

Enclosed is Amendment No. 72, amending your NRC Material License No. 13-00772-02 in accordance with your request to delete the Nickel-63 sources from your license, based on the information you have provided, confirming that they are no longer in your possession and that you have no continuing need for the sources. We also note the four Nickel-63 foil source detector cells that could not be located, which you reported pursuant to 10 CFR 20.2201 by telephone to the USNRC Operations Center on October 25, 2007, followed up by a written report, as lost or stolen sources, on November 1, 2007. You further stated in your amendment request by letter dated November 1, 2007, that in the unlikely event that the lost sources are located on-site, you will arrange to have the sources transferred to Agilent Technologies for proper handling. Also, please note that you should promptly notify the NRC if any of these four sources are subsequently located.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

NRC's Regulatory Issue Summary (RIS) 2005-31 provides criteria to identify security-related sensitive information and guidance for handling and marking of such documents. This ensures that potentially sensitive information is not made publicly available through ADAMS, the NRC's electronic document system. Pursuant to NRC's RIS 2005-31 and in accordance with 10 CFR 2.390, the enclosed license document is exempt from public disclosure because its disclosure to unauthorized individuals could present a security vulnerability. The RIS may be located on the NRC Web site at: <http://www.nrc.gov/reading-rm/doc-collections/gen-comm/reg-issues/2005/ri200531.pdf> and the link for frequently asked questions regarding protection of security related sensitive information may be located at: <http://www.nrc.gov/reading-rm/sensitive-info/faq.html>. A copy of this letter will be available

electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). The NRC's document system is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room).

Sincerely,

A handwritten signature in black ink, appearing to read "Loren J. Hueter".
