**DNMS** 

11 December 2007

U.S. Nuclear Regulatory Commission, Region IV Nuclear Materials Licensing Section 611 Ryan Plaza Drive, Suite 400 Arlington Texas 76011-8064

License: 49-17813-01

030 -13375

To Whom It May Concern:

Please amend the NRC by product materials license to add Perry Fletcher Cook, M.D. as the new radiation safety officer. Dr. Cook is listed as an authorized user on the Lander Valley Medical Center NRC license.

Please remove Roy G. Hediger, M.D. as the RSO on the NRC by product materials license.

Please contact me at (307-335-6250) if you have any questions regarding the enclosed information

Sin**p⊘a**rely,

CEO

Lander Regional Hospital

### Checklist to Ensure That Radioactive Material Will Be Used as Intended

Applicant Information: Control No. 471621

Name: Lander Valley Medical	Type of Request: Amend	
Center, LLC	Program Code(s): 02121	
Location: WY	License No.: 49-17813-01	Docket No.: 030-13375

## STEP 1, ITEM A - INITIAL SCREENING

and dat A or Ite the type	tions for Step 1: Complete Step 1 for all applications. If Step 1, Items A and B, are "YES" then do not complete Step 2. Sign let the completed form and add it to ADAMS as Non-Sensitive and Non-Publicly Available. If a "NO" response is indicated for Item m B, add the complete of form to ADAMS as Sensitive and Non-Publicly Available, and complete Step 2 (Additional Screening). If a of use is subject to a Security Order, complete Step 3, Item A, without delay. If the additional requirements for increased controls applied or voided, complete Step 3, Item B, without delay.	YES or NO
A.	The applicant is a known entity or a licensee transferring control to a known entity. This determination has been made using the screening criteria in Worksheet A below.	Yes

#### Worksheet A

right. B "Yes" is reviewed if the a	ettons for Worksheet A: Answer each of the 6 questions below by placing a "Yes", "No", or "NA" response in the column on the est practices for a reviewer are provided after each of the questions. If the answer to any of the 6 questions is "Yes" then indicate a Step 1, Item A, above. If the answers to all of the 6 questions is "No" then indicate "No" in Step 1, Item A, above. NOTE - If the er has personal knowledge of the applicant's veracity, this can be taken into account in responding to any questions. For example, opplicant's management and/or RSO have been associated with a current or previous NRC or Agreement State license, then the nt may be considered as a known entity.	YES, NO, or NA
1.	Does the applicant have a current Agreement State or NRC license? The reviewer should 1) confirm that a valid license/registration/authorization exists for the applicant; and 2) compare the current license to the application to verify that the application represents a reasonable expansion of the licensee's operation (i.e., medical facility adding a gamma knife or an Agreement State licensee obtaining an NRC license in order to work in NRC jurisdiction without filing reciprocity).	Yes
2.	Does the applicant have a current Agreement State or NRC license at another location and the new application represents the addition of a new facility within the scope of the licensee's core business? The reviewer should contact the appropriate licensing authority to confirm that a valid license/registration/authorization exists for the applicant and the corporate office of the licensee to verify that it has knowledge of and approves of the new application.	
3.	Does the applicant have a current State or Federal government license, registration, authorization, etc., for other operations within the scope of its proposed license activities? (e.g., a company authorized by a State for mining that is now requesting authorization to use fixed gauges). The reviewer should contact the appropriate government office to confirm that the license, registration, authorization, etc., is valid; and the applicant's corporate office to confirm that it has knowledge of and approves of the new application to possess radioactive materials.	
4.	Is the applicant a local, State or Federal government agency? The reviewer should contact the local, State or Federal government office to confirm that the applicant is a government entity.	
5.	Does the application only involve the relocation of an existing licensee, or its mailing address, to another State? This includes new licenses created from existing licenses listing locations in multiple States, in preparation for transfer of licenses to States that will shortly sign an Agreement with the NRC.	
6.	Is the application only the result of a licensee failing to submit a renewal application in a timely manner?	

#### STEP 1, ITEM B - INITIAL SCREENING CONTINUED

B. The applicant is requesting certain radionuclides and quantities that are less than the Risk Significant Quantity (TBq) values in Worksheet B, below, as "highlighted" by the reviewer, or is currently subject to a security order or additional requirements for increased controls. If "Yes", there is no need to proceed further.

Worksheet B - Risk Significant Quantities

(Category 2 Quantities, IAEA Safety Guide No. RS-G-1.9, Categorization of Radioactive Sources, August 2005)

Radionuclide	Risk Significant Quantity (TBq¹)	Risk Significant Quantity (Ci <sup>1</sup> )	Radionuclide	Risk Significant Quantity (FBq <sup>1</sup> )	Biek Significant Quantity (Ci <sup>f</sup> )
Am-241	0.6	16	Pm-147	400	11,000
Am-241/Be	0.6	16	Pu-238	0.6	16
Cf-252	0.2	5.4	Pu-239/Be	0.6	16
Cm-244	0.5	14	Ra-226 <sup>2</sup>	4	11
Co-60	98	8.1	Se-75	2	54
Cs-137	_1	27	Sr-90 (Y-90)	10	270
Gd-153	10	270	Tm-170	200	5,400
1r-192	0.8	22	Yb-169	3	81

The primary values are TBq. The curie (Ci) values are for informational purposes only.

The Atomic Energy Act, as amended by the Energy Policy Act of 2005, authorizes NRC to regulate Ra-226 and NRC is in the process of amending its regulations for discrete sources of Ra-226.

Calculations of the Total Activity or the Unity Rule were completed.  NOTE-If an amendment of an existing license is being requested, the calculations will include the previously authorized quantities for the radionuclide(s).	Yes , No, or Not Applicable (NA)
Total Activity–multiple activities are requested for a single radionuclide and the sum of the activities is less than the Risk Significant Quantity (TBq) for the radionuclide.	
Unity Rule-multiple radionuclides are requested and the sum of the ratios is less than 1.0, e.g., [(total activity for radionuclide A) + (risk significant quantity for radionuclide B)] + [(total activity for radionuclide B) + (risk significant quantity for radionuclide B)] < 1.0.	

**Signature and Date for Step 1:** 

License Reviewer and Date

JAN 29 2008

_	s is to acknowledge the receipt of your letter/application dated  12-11-07. and to inform you that the initial processing, lich includes an administrative review, has been performed.		
卤	There were no administrative omissions. Your application will be assigned to a technical reviewer. Please note that the technical review may identify additional omissions or require additional information.		
	Please provide to this office within 30 days of your receipt of this card:		
The	e action you requested is normally processed within 90 days.		
	A copy of your action has been forwarded to our License Fee & Accounts Receivable Branch, who will contact you separately if there is a fee issue involved.		
Your action has been assigned <b>Mail Control Number</b> 47/62/. When calling to inquire about this action, please refer to this mail control number. You may call me at 817-860-8103.			
	Sincerely,		
	Colleen Murnahan
