Byron Station, Unit 2
Facility Operating License No. NPF-66
NRC Docket No. STN 50-455

Subject: Clarification to Byron Station Unit 2 Relaxation Request

Reference: Letter from D. M. Hoots (Exelon Generation Company, LLC) to U. S. Nuclear Regulatory Commission, "Relaxation Request From First Revised NRC Order EA-03-009 Establishing Interim Inspection Requirements for Reactor Pressure Vessel Heads at Pressurized Water Reactors," dated August 30, 2007

The purpose of this letter is to provide a clarification regarding the proprietary content of information contained in the referenced submittal. The cover letter of the referenced submittal states in part that: "Attachment 1 contains Westinghouse proprietary information"; however, this is not the case. Attachment 1 to the referenced submittal contains information excerpted from the proprietary version of WCAP-16349, "Structural Integrity Evaluation of Reactor Vessel Upper Head Penetrations to Support Continued Operation: Byron and Braidwood Units 1 and 2." However, this same information is contained in the non-proprietary version of WCAP-16349 and is not considered proprietary to Westinghouse Electric Company, LLC. Therefore, the referenced submittal can be made publicly available in its entirety.

This letter contains no regulatory commitments. If you have any questions, please contact David J. Chrzanowski at (630) 657-2816.

Respectfully,

Patrick R. Simpson
Manager - Licensing
