70-58

SEP 24 1962

Martin-Marietta Corporation
Baltimore 3, Maryland

Attention: Mr. W. Wachtl
Contracts Manager

Gentlemen:

Pursuant to 10 CFR 71, you are hereby authorized under License
SNM-53 to ship at any one time one FM-3A central core bundle
in accordance with the procedures and conditions described in your
request of August 29, 1962.

The granting of this authorization does not imply a determination
by AEC that the package you propose to ship will withstand a
thirty foot fall on a flat unyielding surface with no more than
a 10% reduction in the minimum spacing measured from the outside
of the inner container to the outside of the outer container.

We find no basis in your request for the assumption that the im-
pact forces from a thirty foot drop would not be greater than

(b)(4) s. We believe this and other assumptions made in your analysis ^{Ex 4}
should be substantiated, preferably by tests, in the event you would
want approval in the future for shipments involving greater quantities
of U-235, more than a single container, or by other than exclusive
use vehicle.
