

UNITED STATES GOVERNMENT

Memorandum

TO : Donald A. Nussbaumer, Chief, Source and
Special Nuclear Materials Branch, DLR

DATE: JUL 30 1963

FROM : Christian Beck, Staff Engineer - Structural
Fuels Processing Branch, DLR *CB*

SUBJECT: MARTIN CO. SHIPPING CONTAINER FOR PATHFINDER FUEL

DLR-FPB-CB

ATTN: R. L. Layfield

I have reviewed the revised design of subject shipping container and found that the strengthening of the design, as suggested at the June 25th meeting, has been taken care of. The only comment I have concerns the structural analysis (Appendix A) in Martin Co.'s report, dated June 24, 1963. The analysis is based on a combination of the structural requirements of both Part 71 and 72. The ^{(b)(4)} loading as specified in Part 72 has nothing to do with subject design, which should be based entirely on the requirements specified in Part 71. Ex 4
