

## Nuclear Events Web-based System (NEWS) Event Detail

<b>Event Title:</b>	Situation of the plants at Kashiwazaki-Kariwa site after the earthquake, as of 07/07/20 1700JST		
<b>Event Date:</b>	2007-07-20	<b>Date Sent:</b>	2007-07-20 12:10:00 UTC
<b>Facility/Place:</b>	Kashiwazaki-Kariwa	<b>Facility Type:</b>	Power Reactor
<b>Country:</b>	Japan	<b>Reactor Type:</b>	Boiling Water Reactors
<b>Event Sender:</b>	Shin Morita	<b>INES Rating:</b>	[Not Available]

### Event Abstract:

All power reactors are being shut down. The following are situation of the plants.

#### Unit #1

- The ventilation duct is bended at the connection to the main stack. Investigation continues.
- Water with radioactive material is on B5th floor of reactor complex building.
- Water which is thought to be from the spent fuel storage pool spread on the operation floor.

#### Units #2, 3, 4, 5

- The ventilation duct is bended at the connection to the main stack. Investigation continues.
- Water which is thought to be from the spent fuel storage pool spread on the operation floor.

#### Unit #6

- Water which is thought to be from the spent fuel storage pool spread on the operation floor.
- Water with radioactive material was found at 3 and 3M floors on July 16.

#### Unit #7

- Water which is thought to be from the spent fuel storage pool spread on the operation floor.
