JAN 27 2008

Subhash C. Sharma, Ph.D.
Radiation Safety Officer
Parkview Health
2200 Randallia Drive
Fort Wayne, IN 46805

Dear Dr. Sharma:

Enclosed is Amendment No. 92 to your NRC Material License No. 13-01284-02 in accordance with your request. Please note that the changes made to your license are printed in **bold font**.

Please review the enclosed document carefully, as many changes to your license have been made, and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

This also refers to RIS 2005-31, especially Table 1, Attachment 2, page 19 of 19. Please note the activity thresholds listed for materials commonly included in 10 CFR 35.400 and 35.500, which correspond to Subitem Nos. 7.D. and 7.E. of your license.

Please specify which radionuclides in 10 CFR 35.400 and 35.500 you want authorization for and please include the manufacturer's names/model numbers for each. We must now review license applications and prepare license documents in accordance with RIS 2005-31 and the requested information is necessary to complete that review.

I originally requested this information from you in my letter dated May 24, 2006, which transmitted Amendment No. 89. To date, I have not received a reply. Therefore, please submit this information within 30 days of the date of this letter or contact me at 630-829-9841 to make arrangements for an alternative response date.

NRC's Regulatory Issue Summary (RIS) 2005-31 provides criteria to identify security-related sensitive information and guidance for handling and marking of such documents. This ensures that potentially sensitive information is not made publicly available through ADAMS, the NRC's electronic document system.

Pursuant to NRC's RIS 2005-31 and in accordance with 10 CFR 2.390, the enclosed license document is exempt from public disclosure because its disclosure to unauthorized individuals could present a security vulnerability.

The RIS may be located on the NRC Web site at: <http://www.nrc.gov/reading-rm/doc-locations/gen-comm/reg-issues/2005/ri200531.pdf> and the link for frequently asked questions regarding protection of security related sensitive information may be located at: <http://www.nrc.gov/reading-rm/sensitive-info/faq.html>.

If you have further questions concerning these matters please contact me at (630) 829-9841 or (800) 522-3025.

Please note that NRC Form 313 requires the applicant, by his/her signature, to verify that the applicant understands that all statements contained in the application are true and correct to the best of the applicant's knowledge. The signatory for an application for medical use must be the licensee's management, as required by 10 CFR 35.12(a).

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

Sincerely,

Colleen Carol Casey
Materials Licensing Branch

License No. 13-01284-02
Docket No. 030-01593
