Subject: INFO: Latest News Releases Regarding Japanese Earthquake

All,

Please find attached the two latest Japanese news releases regarding the impact of the earthquake on the Kashiwazaki-Kariwa nuclear power plant. The utility has identified some other minor issues related to the earthquake that are discussed in the attached. I have also attached a picture of the Unit 6 spent fuel pool that was taken by a security camera during the earthquake.

FYI, we're working on closing out the preliminary portion of the Issue for Resolution soon. The evaluation will indicate that there are no immediate safety concerns for plants in the US as a result of the earthquake. Our plan for the long-term is to develop a user-needs letter to ask RES to perform an evaluation of the lessons learned.

Thank you for your support,

Brett
