~~NON-SENSITIVE - NOT FOR PUBLIC DISCLOSURE~~

EDO Daily Notes for September 21, 2007

Region I

- On September 28, the Peach Bottom Augmented Inspection Team (AIT) conducted a debrief with Exelon management. This eight-person team, which included an NSIR representative and three Office of Investigation staff, reviewed the facts surrounding this event, assessed the short term corrective actions, and evaluated the security program to ensure its effectiveness. The AIT also independently determined the extent of security officer inattentiveness as indicated by multiple video clips obtained from a WCBS-TV news report. WCBS-TV aired their report of sleeping security officers on September 24th and 25th. The AIT plans a formal public exit meeting on Tuesday evening, October 9, near the Peach Bottom site.
