RADIOACTIVE MATERIAL LICENSE

Amendment 195

Pursuant to Tennessee Department of Environment and Conservation Regulations, and in reliance on statements and representations heretofore made by the licensee, a license is hereby issued authorizing the licensee to receive, acquire, possess and transfer radioactive material listed below; and to use such radioactive material for the purpose(s) and at the place(s) designated below. This license is subject to all applicable rules and regulations of the Tennessee Department of Environment and Conservation and orders of the Division of Radiological Health, now or hereafter in effect and to any conditions specified below.

1. Name Duratek Services, Inc. 2. Address 1790 Dock Street P.O. Box 13464 Memphis, TN 38113		3. License number R-79171-L16 amended in its entirety	
		4. Expiration date December 31, 2016	
		5. File no. R-79171	
6. Radioactive Material (Element and Mass Number) <p style="text-align: center;">See</p>	8. Chemical and/or physical form <p style="text-align: center;">Supplementary</p>	9. Maximum Radioactivity and/or quantity of material which licensee may possess at any one time. <p style="text-align: center;">Sheets</p>	
10. Authorized Use <p style="text-align: center;">See Supplementary Sheets</p>			

CONDITIONS

11. Unless otherwise specified, the authorized place of use is the licensee's address stated in item 2, above.

See Supplementary Sheets

For the Commissioner

6. Radioactive Material (Element and Mass Number)	8. Chemical and/or Physical Form	9. Maximum Radioactivity and/or Quantity of Material Which Licensee May Possess at Any One Time
A. Mixed activation and fission products with atomic numbers 3-83 inclusive, and other radionuclides with atomic numbers 84-92 (except Uranium 233, Uranium 235, and Plutonium), and 95-100 inclusive	A. Any form suitable for transport under U.S. Department of Transportation Regulations (oxides, metallic residues, organic and inorganic); not to include sealed sources	A. 240 curies
B. Uranium enriched in the U-235 isotope	B. Same as 8A.	B. 350 grams of * contained U-235
C. Uranium 233	C. Same as 8A.	C. 200 grams *
D. Plutonium	D. Same as 8A.	D. 200 grams * and 2 Curies
E. Iron 55	E. Same as 8A.	E. 100 Curies
F. Transuranics (not Pu or Am-241)	F. Same as 8A.	F. 2.5 Curies
G. Uranium (depleted and natural)	G. Same as 8A.	G. 20 Curies

* For each kind of special nuclear material, determine the ratio between the quantity of that special nuclear material and the quantity specified here for the same kind of special nuclear material. The sums of such ratios for all kinds of special nuclear material in combination shall not exceed "1" (i.e., unity).

License Number R-79171-L16

H. Any Radioactive Material
(except special nuclear material)

H. Sealed source

H. No single source to
exceed 5 millicuries.
Total not to exceed
10 millicuries.

I. Cesium 137

I. Sealed source
(Models listed in
NRC Registry
CA0598D106S)

I. One (1) source not to
200 millicuries.

10. **Authorized use**

A. through G.

1. Receipt, possession, storage, handling, unpackaging, packaging, transport, transfer, processing, decontamination, sampling and analysis, and release for unrestricted use in the performance of Memphis Facility operations. This authorization does not include the Bulk Waste Assay Program.
2. The licensee is authorized to receive, store, or transfer – as radioactive activation products inherent in, or radioactive contamination on - nuclear power plant components, (see note), accessories, (see note), and other equipment and components authorized by a license issued by the United States Nuclear Regulatory Commission, any Agreement State, a Licensing State, or by the Atomic Energy Act. This authorization shall be in accordance with Conditions of this license provided the following condition is met:

No items, other than nuclear power plant components, accessories, and reusable equipment owned by the company, clients and others may be stored under this license for a period of time greater than 365 days.

3. The licensee is authorized to modify nuclear power plant components, (see note), accessories, (see note), and other equipment and components .
4. The licensee is authorized to perform mechanical, physical, and chemical decontamination on nuclear power plant components, (see note), accessories, (see note), and other equipment, components and materials suitable for decontamination.

TENNESSEE DEPARTMENT OF ENVIRONMENT AND CONSERVATION
DIVISION OF RADIOLOGICAL HEALTH

RADIOACTIVE MATERIAL LICENSE

Amendment 195

Page 4 of 11 Pages

License Number R-79171-L16

NOTE:

Nuclear power plant **components** and **accessories** are herein defined as follows:

Components - contaminated vessels and heads, control rods, pumps, steam generator tubes, steam generators, control rod drive assemblies, valves, heaters, heat exchangers, pressurizers, tanks, meters, fans, turbines, electrical generators, ejectors, dryers, separators, and any other item necessary to the operation or safety of an operating nuclear power plant.

Accessories - tools used in assembling, disassembling, testing, and handling of nuclear power plant components.

5. The licensee is authorized to receive and process radioactive material from unlicensed facilities or sites for decontamination or disposal.

H. For use in instrumentation standardization and calibration.

I. For use in a J. L. Shepherd Model 28-5 Low Range Beam Calibrator for purposes of calibration of portable radiation detection equipment.

Conditions (continued)

12. The licensee shall comply with applicable provisions of 1200-2-4, 1200-2-5, and 1200-2-10 of "State Regulations for Protection Against Radiation."

13. Radioactive material authorized by this license may be used and stored only at Duratek Services, Inc, 1790 Dock Street, Memphis, TN.

14. A. Radioactive material authorized by this license shall be used by, or under the supervision of,

Ron Davis
Nancy S. Mincey
Ernest Nelson

Charles Lee Owens
George T. Scott

B. An authorized user shall be present on site during chemical decon operations, grit blasting operations, thermal cutting, and high radiation area work. An authorized user shall be

DIVISION OF RADIOLOGICAL HEALTH

RADIOACTIVE MATERIAL LICENSE

Amendment 195

Supplementary Sheet

Page 5 of 11 Pages

License Number R-79171-L16

available for telephone consultation during periods when other activities are being conducted on the site. A Health Physics Technician shall be on site during work in Radiologically Controlled Areas associated with this license.

- C. The Radiation Safety Officer for this license is Ron Davis.
15. A. The licensee shall develop and maintain a written radiation protection manual that ensures the implementation of the radiation protection program in accordance with "State Regulations for Protection Against Radiation" (SRPAR), ALARA, and documents referenced in conditions of this license. Changes to this manual require prior written approval from the Department. Department approval of the current revision of this manual [Duratek, Inc. Radiation Safety Guide (RSG-1)] conveys its approval under all applicable Tennessee Duratek licenses.
- B. In addition, the licensee shall develop and implement written standard operating procedures to ensure all activities involving the handling and/or use of radioactive materials authorized by this license are carried out in a manner consistent with SRPAR, ALARA, the licensee's Radiation Protection Manual, and the documents referenced in conditions of this license.
- C. These procedures may be modified without prior approval of the Department when deemed appropriate and documented by the Radiation Safety Officer. However, adherence to the current procedures as written shall be considered a condition of this license. The written procedures required by this condition shall be available for inspection by the Department. A copy of the current procedures shall be forwarded to the Department upon request.
16. In addition to other requirements of this license or of Chapter 1200-2-5-.60 "State Regulations For Protection Against Radiation," the licensee shall conduct operations so that radiation levels in unrestricted areas would not cause an individual, assuming an occupancy of one (1), to receive a total effective dose equivalent in excess of 500 millirems in one calendar year. These radiation levels shall be appropriately monitored by the licensee, and records of such monitoring shall be maintained for inspection by the Department. For calculational purposes of this condition, the licensee shall base its anticipated exposure to a member of the public upon the sum of the maximally exposed TLD and the highest air concentration derived using the latest available pertinent data.

Amendment 195

Supplementary Sheet

Page 6 of 11 Pages

License Number R-79171-L16

17. No radioactive material (excluding calibration and standardization sources and as referenced in Items 10.A.-G. 2. of this license and RSG-1) or radioactive waste may be possessed under this license, from its time of receipt, until its transfer from the facility, for a period of time greater than three hundred sixty-five (365) days.
18. No radioactive material or radioactive waste may be stored so as to exceed the following stacking limits except for 4400 square feet in Building D which may be stored up to 20 feet nominal:

<u>Container Type</u>	<u>Stacking Limit</u>
1. Drums	3 high
2. B-25 Boxes	3 high
3. B-12 Boxes	5 high
4. Sea-Land Containers	1 high
5. Any other strong tight container	10 feet nominal unless the natural height of the container exceeds 10 feet

This condition also includes "waste radioactive material" generated under the authority of this license.

19. The licensee shall maintain complete and accurate records of the receipt and disposal of radioactive material. The licensee shall, for radioactive material no longer useful for any purpose and for any equipment or supplies contaminated with such material for which further use and decontamination is not planned, define those materials as radioactive waste and treat them as such in accordance with the following provisions:
 - A. Radioactive waste material shall not be stored with non-radioactive waste.
 - B. A written record of all radioactive waste material shall be maintained until it has been determined by a suitable survey or radioassay that it has decayed to background levels or until it has been shipped to an authorized recipient in accordance with all applicable regulations. Accountability of radioactive waste material prepared for shipment but not yet shipped from the licensee's premises shall be maintained by the licensee by an internal record system such that the licensee is constantly aware of the material's location and the proposed time of shipment. Individuals who are involved in the shipping

DIVISION OF RADIOLOGICAL HEALTH

RADIOACTIVE MATERIAL LICENSE

Amendment 195

Supplementary Sheet

Page 7 of 11 Pages

License Number R-79171-L16

of such material and/or the storage of such material prior to shipment, shall be trained in the precautions necessary for such handling and storage.

- C. For material which has decayed to background levels as determined by radioassay or external level as measured with appropriately calibrated instruments, records shall indicate that the material was determined to be no longer radioactive and will indicate the methods and results of the survey or analysis.
- D. Shipment records of radioactive waste material shall be maintained and the licensee shall require written confirmation from the authorized recipient of such material that this material has been received.
- E. All records and written confirmations required by this condition shall be maintained for inspection by the Department.

The requirements for this condition are in addition to any other requirements for the handling and/or disposal of radioactive material contained in this license and "State Regulation for Protection Against Radiation."

- 20. The licensee shall not accept either radioactive waste and/or items contaminated or potentially contaminated with licensable quantities of radioactive material or radioactive materials or items from licensable activities for repackaging, processing, storage pending transfer/disposal, or transfer/disposal unless the shipper of such waste possesses a valid license for delivery issued pursuant to 1200-2-10-.32 of "State Regulations for Protection Against Radiation."
- 21. Written assurances must be furnished by the facility shipping the radioactive material indicating that the facility may accept return of the material processed or unprocessed. In addition, for states outside the Southeast Compact the state or appropriate Compact must be a signatory to the Interregional Access Agreement for Waste Management or assurances shall be obtained from the appropriate state governor's office, the state radiation control program, and the appropriate Compact official, if any.
- 22. The licensee shall establish in every contractual obligation relating to radioactive materials the ability to return radioactive materials, processed or unprocessed, to the prior licensed or exempt possessor.

License Number R-79171-L16

- h. Have any labels previously applied removed, obliterated, or covered and an "Empty" label affixed [173.428 (d)]
 - i. Be stored on a paved (asphalt or concrete) surface
 - j. Be arranged such that all containers can be visually inspected on at least one side
- 26. The licensee in making disposal of radioactive wastes to the sanitary sewerage system shall do so in conformity with 1200-2-5-.122 of "State Regulations for Protection Against Radiation."
- 27. The following evaluations shall be performed for all process ventilation systems:
 - 1) Air balance within the RCA at least semi-annually, and following any ventilation system or process changes which could potentially alter the effectiveness of the system.
 - 2) Particulate removal efficiency of the main filtration system HEPA filters by DOP or comparable testing in accordance with pertinent ANSI standards immediately following installation of new HEPA filters or at least semi-annually.
- 28. A. Sealed sources authorized by this license in Items H and I shall be tested for leakage and/or contamination at intervals not to exceed six (6) months. In the absence of a certificate from a transferor indicating that a test has been made within six (6) months prior to transfer, the sealed source shall not be put until use until tested.
- B. The test shall be capable of detecting the presence of 0.005 microcurie of radioactive material on the test sample. The test sample shall be taken from the sealed source or from the surface of the device in which the sealed source is permanently mounted or stored on which one might expect contamination to accumulate. Records of leak tests shall be kept in units of microcuries and maintained for inspection by the Department.
- C. If the test reveals the presence of 0.005 microcurie or more of removable contamination, the licensee shall immediately withdraw the sealed source from use and shall cause it to be decontaminated and repaired or to be disposed of in accordance with Department

TENNESSEE DEPARTMENT OF ENVIRONMENT AND CONSERVATION
DIVISION OF RADIOLOGICAL HEALTH

RADIOACTIVE MATERIAL LICENSE

Amendment 195

Supplementary Sheet

Page 10 of 11 Pages

License Number **R-79171-L16**

regulations. A report shall be filed within five (5) days of the test with the Division of Radiological Health, Tennessee Department of Environment and Conservation, 401 Church Street, 3rd Floor L & C Annex, Nashville, Tennessee, 37243-1532, describing the equipment involved, the test results, and the corrective action taken.

- D. Tests for leakage and/or contamination shall be performed by the licensee or by other persons authorized by this Department, the U.S. Nuclear Regulatory Commission, or another Agreement State to perform such services.
29. The licensee shall not open or remove sealed sources containing radioactive material from their respective source holders.
30. Notwithstanding the periodic leak test required by Condition 28, any licensed sealed source is exempt from such tests when the source contains 100 microcuries or less of beta and/or gamma emitting material or 10 microcuries or less of alpha emitting material.
31. In addition to the possession limits in Item 9, the licensee shall further restrict the possession of licensed material to quantities below the limits specified in "State Regulations for Protection Against Radiation" 1200-2-10-.13(17)(a) which require consideration of the need for an emergency plan for responding to a release of licensed material.
32. The licensee is authorized to receive, possess, and use any radioactive material distributed under a general license, issued by the U.S. Nuclear Regulatory Commission, or another Agreement State, without being specifically referenced in Items 6, 8, 9 and 10 of this license. Notwithstanding any other conditions of this license, the general licensee may possess and use radioactive material received under the provisions of 1200-2-10 of "State Regulations for Protection Against Radiation" in accordance with the requirements provided at the time of the transfer of the radioactive material under the terms of the general license.
33. Except for plutonium contained in a medical device designed for individual human application, no plutonium, regardless of form, shall be delivered to a carrier for shipment by air transport or transported in an aircraft by the licensee except in packages the design of which the NRC has specifically approved for transport of plutonium by air.
34. The licensee has provided \$5,563,404.00 (five million five hundred sixty three thousand four hundred four US Dollars) in financial assurance monies in accordance with "State Regulations for Protection Against Radiation" 1200-2-10-.12(4). This financial assurance

License Number R-79171-L16

will provide for a total of 132,462 feet of licensed space under current Departmental calculation policy.

35. No provision of this license relieves the licensee from compliance with other Federal, State, and local laws, ordinances, and regulations applicable to the licensee's activities.
36. A. Except as specifically provided otherwise by this license, the licensee shall possess and use radioactive material described in Items 6, 8, and 9 of this license in accordance with statements, representations, and procedures contained in the following:
- Application dated August 29, 2006, with attachments
 - Letters dated September 25, 2006, with attachments, and December 14, 2006, with attachments
- B. The licensee shall comply with the requirements described in the Division of Radiological Health letter dated October 24, 2005, and attached document entitled "INCREASED CONTROLS FOR LICENSEES THAT POSSESS SOURCES CONTAINING RADIOACTIVE MATERIAL QUANTITIES OF CONCERN." The licensee shall complete implementation of said requirements the first day that radionuclides in quantities of concern are possessed at or above the limits specified in Table 1 of the attachment. Within 25 days after the implementation of the requirements of this condition, the licensee shall notify the Division of Radiological Health in writing that it has completed the requirements of this condition.
