Attn: Mr. William G. Snell, RIII/DNMS/DB

Subject: Submittal of Embedded Pipe Survey Unit Release Records, Plum Brook
Reactor Facility, License No. TR-3, Docket No. 50-30, and License No. R-93,
Docket No, 50-185

Dear Mr. Snell:

Enclosed for your review and assessment are electronic copies of completed embedded pipe survey unit release records that have been scanned into PDF Format. The following survey unit release records are included on one compact disk:

- Survey Unit Release Record EP-ROLB-102
- Survey Unit Release Record EP-ROLB-109
- Survey Unit Release Record EP-ROLB-111

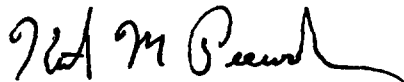

In addition, in response to your telephone conversation with Mr. John Thomas of my staff on October 22, 2007, we believe that some pages were missed during duplication of eight of the 23 Survey Unit Release Records that were submitted by our letter dated October 15, 2007. Accordingly, complete copies of those eight records have also been scanned into PDF Format and are included on the compact disk. The following survey unit release records are included as replacements for those previously submitted:

- Survey Unit Release Record EP-201A
- Survey Unit Release Record EP-202A
- Survey Unit Release Record EP-203B
- Survey Unit Release Record EP-A3
- Survey Unit Release Record EP-B1
- Survey Unit Release Record EP-B3
- Survey Unit Release Record EP-C2
- Survey Unit Release Record EP-D6

I apologize for any inconvenience that these errors in duplication may have caused. We have taken steps to assure page checking of copies prior to submittal in the future to prevent recurrence of this error.

Should you have any questions or need additional information, please contact Mr. William Stoner of my staff, NASA Plum Brook Station, 6100 Columbus Avenue, Sandusky, OH 44870, at (419) 621- 3349, or Mr. John Thomas of my staff, NASA Plum Brook Station, 6100 Columbus Avenue, Sandusky, OH 44870, at (419) 621- 3357.

Sincerely,

A handwritten signature in black ink, appearing to read "Keith M. Peacock". The signature is fluid and cursive, with a long horizontal stroke at the end.

Keith M. Peacock
Program Manager
