Subject: Closure of hospital, License No. 29-07213-03, Docket No. 03009949

Dear Ms. White:

It is our understanding that Columbus Hospital may be closing on or about June 1, 2008. Columbus Hospital holds a radioactive materials license from the U.S. Nuclear Regulatory Commission. Prior to the closure of the hospital, this license must be terminated. To effect termination, the following steps must be taken:

- 1) Dispose of all sealed radioactive sources to someone licensed to possess them. This might be another hospital, the manufacturer, or a licensed waste broker.
- 2) A contamination survey must be conducted of areas where radioactive materials were stored or used, showing that there is no residual contamination.
- 3) A letter must be sent to the U.S. Nuclear Regulatory Commission, 475 Allendale Road, King of Prussia, PA 19406, requesting termination of the license. Documentation for 1) and 2) above should be attached.

Should you have any questions regarding the above, please feel free to call me at (610)337-5102.

Sincerely,
Richard McKinley
