Gentlemen:

In the Matter of the Application of )  
Tennessee Valley Authority )

Docket Nos. 50-390  
50-391

WATTS BAR NUCLEAR PLANT (WBN) UNITS 1 AND 2 - INADEQUATE QUALIFICATION FOR  
CABLE SUPPORTS AND FITTINGS - WBRD-50-390/89-06, WBRD-50-391/89-06 - INTERIM  
REPORT

The subject deficiency was initially reported to NRC Region II Inspector  
Joe Brady on June 22, 1989, in accordance with 10 CFR 50.55(e) as Condition  
Adverse to Quality Reports WBP 880040 and WBP 880041. TVA's initial response  
on this issue was submitted as an interim report on July 26, 1989.

TVA has been reviewing civil/seismic issues at WBN, the results of which may  
influence resolution of this deficiency. A meeting between TVA and NRC is  
scheduled for August 2, 1990, to discuss the results of this review;  
therefore, TVA expects to submit a final 50.55(e) report by August 31, 1990,  
rather than July 31, 1990, as previously committed. Mr. Ken Barr, NRC Region  
II, was notified of this change on July 27, 1990.

The enclosure contains the commitment stated in this submittal.

If there are any questions, please telephone P. L. Pace at (615) 365-8527.

Very truly yours,

TENNESSEE VALLEY AUTHORITY
