 or Report No(s).

Name of Licensee: II-VI Incorporated
 Name of Participant(s): Jason Tennant, RSO
 Telephone No. 724-352-4455
 Subject: decommissioning of Warehouse complex
 (NOTE: This will be used as the Documents Title in ADAMS)

Summary:
 I called Mike to discuss the paragraph of the 1/10/08 letter notifying us of the decommissioning of the warehouse, and his call to John Nicholson on 2/14/08 to say that they were performing surveys.

I explained that, unless the facilities were unable to be released for unrestricted use, a notification is not required. But because the notification is in the same letter as the other amendment requests, I would refer to it in the cover letter.

I asked if they had determined the release criteria that they would be using, because NRC's screening level for thorium is very restrictive. He stated that Carol Berger of IEM Associates is developing a MARSSIM plan for them. I told him that, if they plan on requesting site-specific DCGL's, they will need to have the proposed DCGLs approved by the NRC before they can use them, and that they will need to submit any RESRAD (or other model) input files, output files, and sensitivity analysis for the site-specific values used. We discussed this a bit.

I also explained that it is unlikely that we would be able to process that amendment request prior to Pennsylvania becoming an agreement state. He expects to have the site-specific DCGLs by the end of the month, and would submit them. I explained that it is unlikely we would begin such a complex review so close to the transfer date.

Action Required: Telecon to ADAMS file for 141597.
