Subject: Disposal of nuclear waste in Utah from Italy

I am writing to give you my opinion on the plan of EnergySolutions Inc. to import about 20,000 tons of nuclear waste from Italy for processing in Tennessee and disposal in Utah.

I just read about this in one of our papers (The Daily Herald) this morning, and I am 100% AGAINST that happening in my state of Utah or any state in the United States. It just makes sense to me that countries and individual states should dispose of their own nuclear waste in their own countries or states.

Mike Johnson, president of the company's Commercial Facilities Group, was quoted as saying, "This is not anything different than what we've done." That may be true, but it does not make it right just because it has been done in the past. I think the public has been unaware of what's been going on and I'm sure Mike Johnson has not made a point of making this public, especially to people in the state of Utah.

I am a registered voter here, have lived in Utah for over 30 years, raised my 6 children here, been a home owner here, paid taxes here, volunteered here, and I love this state and this country. Other countries and other states can take care of their own nuclear waste within the borders of their own country and states and not send their waste to be disposed of in Utah.

I hope my opinion will be heard.
