OFFICE OF SECRETARY
RULEMAKINGS AND
ADJUDICATIONS STAFF

JAMES T. RYBICKI

20

Secretary, U.S. Nuclear Regulatory Commission 2/6/08
Washington, D.C. 20555-0001

Attn: Rulemaking and Adjudication Staff

Both myself, and my wife are opposed to the EnergySolutions application to accept low-level radioactive waste from Italy. We have a second home in Sandy, Utah which is directly east of the disposal site. The prevailing winds are from the west. The Great Salt Lake is in between, and it's a known fact from work done by University of Utah researchers that the lake already has a high content of pollutants from both the mining industry in Nevada, and the waste sites directly to the east. We don't understand why government, both State and Federal allow toxic waste sites to be so close, and downwind of the largest population concentration in the state. This applies to Dugway Proving Ground, and Yucca Mountain as well.

Thank you for your time. Have a great day!
