RE: TRANSFER OF PMK GROUP NRC LICENSE NUMBER 29-27828 -01
NRC DOCKET OR REFERENCE NUMBER 030-29217 *hus*

Dear Mrs. Modes:

This letter provides the information requested in NUREG 1556 Vol. 1 Appendix C, Titled "Information Needed for Change in Ownership or Control Application."

1. The new name of the licensed organization. If there is no change, the licensee should so state.

The name of the PMK Group, Inc. will remain, however, see Item #5 below.

2. The new licensee contact and telephone number(s) to facilitate communications.

No change.

3. Any change in personnel having control over licensed activities (e.g., officers of a corporation) and any change in personnel named in the license such as RSO, authorized users, or any other persons identified in previous license applications as responsible for radiation safety or use of licensed material. The licensee should include information concerning the qualifications, training, and responsibilities of new individuals.

The officers of PMK Group, Inc. are now:

James Johnston, President
Dianne Seymour, Treasurer
Dianne Seymour, Secretary

Only one person is named in the license, the RSO, Roman Burak. Roman Burak will continue as the RSO. The authorized users are employees within the geotechnical discipline. The

license is managed by members of the geotechnical discipline. The members within the geotechnical discipline including the RSO and the supervisor for the RSO remain unchanged.

4. An indication of whether the transferor will remain in non-licensed business without the license.

The transferor is incorporated into the transferee as described in Items 3 and 5.

5. A complete, clear description of the transaction, including any transfer of stocks or assets, mergers, etc., so that legal counsel is able, when necessary, to differentiate between name changes and changes of ownership.

In accordance with an Asset Purchase Agreement dated December 14, 2007, between Birdsall Services Group, Inc. (BSG) and PMK Group, Inc. (PMK), on January 3, 2008 BSG, through its newly created wholly owned subsidiary named PMK Environmental Services Inc. (PMK-Environmental), acquired substantially all of the assets of PMK effective as of January 1, 2008. The consideration paid for the assets was a combination of cash and BSG common stock. The assets sold by PMK included all equipment, furniture, vehicles, client agreements, accounts receivable, transferrable licenses and permits, and the rights to its corporate name. Also effective as of January 1, 2008, employees of PMK became employees of PMK-Environmental. At the closing PMK executed and delivered documents changing its name to 65 Jackson Inc. The name change was filed with the state of New Jersey, immediately following which PMK-Environmental changed its name to PMK Group, Inc. 65 Jackson Inc. continues in existence but is no longer engaged in active business operations.

6. A complete description of any planned changes in organization, location, facility, equipment, or procedures (i.e., changes in operating or emergency procedures).

No change, except as described in items 3 and 5.

7. A detailed description of any changes in the use, possession, location, or storage of the licensed materials.

No change.

8. Any changes in organization, location, facilities, equipment, procedures, or personnel that would require a license amendment even without the change of ownership.

No change.

9. An indication of whether all surveillance items and records (e.g., calibrations, leak tests, surveys, inventories, and accountability requirements) will be current at the time of transfer. Provide a description of the status of all surveillance requirements and records.

US Nuclear Regulatory Commission – Region 1
Att: Mrs. Kathy Modes
January 31, 2008
Page 3

All surveillance items and records are current and will be maintained current. No changes in personnel, equipment, locations or procedures are being made.

10. Confirmation that all records concerning the safe and effective decommissioning of the facility, pursuant to 10 CFR 30.35(g), 40.36(f), 70.25(g), and 72.30(d); public dose; and waste disposal by release to sewers, incineration, radioactive material spills, and on-site burials, have been transferred to the new licensee, if licensed activities will continue at the same location, or to NRC for license terminations.

No changes in personnel, equipment, locations or procedures are being made.

11. A description of the status of the facility. Specifically, the presence or absence of contamination should be documented. If contamination is present, will decontamination occur before transfer? If not, does the successor company agree to assume full liability for the decontamination of the facility or site?

No changes in personnel, equipment, locations or procedures are being made. Current leak test results indicate that contamination is absent.

12. A description of any decontamination plans, including financial assurance arrangements of the transferee, as specified in 10 CFR 30.35, 40.36, and 70.25. Include information about how the transferee and transferor propose to divide the transferor's assets, and responsibility for any cleanup needed at the time of transfer.

No changes in personnel, equipment, locations or procedures are being made. Current leak test results indicate that contamination is absent.

13. Confirmation that the transferee agrees to abide by all commitments and representations previously made to NRC by the transferor. These include, but are not limited to: maintaining decommissioning records required by 10 CFR 30.35(g), implementing decontamination activities and decommissioning of the site, and completing corrective actions for open inspection items and enforcement actions.

With regard to contamination of facilities and equipment, the transferee should confirm, in writing, that it accepts full liability for the site, and it should provide evidence of adequate resources to fund decommissioning; or the transferor should provide a commitment to decontaminate the facility before change of control or ownership.

With regard to open inspection items, etc., the transferee should confirm, in writing, that it accepts full responsibility for open inspection items and/or any resulting enforcement actions; or the transferee proposes alternative measures for meeting the requirements; or the transferor provides a commitment to close out all such actions with NRC before license transfer.

Page 4

No change in personnel managing the license as described above. Further, we will continue to restrict the possession of licensed material for establishing financial assurance for decommissioning as specified in item 13 of the license.

14. Documentation that the transferor and transferee agree to the change in ownership or control of the licensed material and activity, and the conditions of transfer; and the transferee is made aware of all open inspection items and its responsibility for possible resulting enforcement actions.

No change in personnel managing the license as described above.

15. A commitment by the transferee to abide by all constraints, conditions, requirements, representations, and commitments identified in the existing license. If not, the transferee must provide a description of its program, to ensure compliance with the license and regulations.

No change in personnel managing the license as described above.

If you have any questions with regards to this letter, please call me at (908) 497-8900.

Sincerely,

PMK Group

James Johnston, P.E.
President
