Subject: RE: Falls City Well Sampling

Jon,

Here is the Falls City sample analysis for April 4 and 5, 2007. Well number 0891 was not sampled because the samplers were not able to locate it in the overgrowth. We have since had paths cleared to the wells and it is planned to sample the well during the late October sampling event.

Contact me with questions or concerns.

Bob,

I would like the analytical results for both the laboratory and field determined parameters for all 10 or 12 monitoring wells (usually two wells have been dry). Also, please provide the groundwater levels for this sampling event.

Thanks.

Jon
