Office of Nuclear Reactor Regulation (NRR)
Items of Interest
Week Ending February 8, 2008

Duke Power Company - Oconee Tornado/High Energy Line Break Mitigation Strategy

On January 25, 2008, Duke Power Company provided a revision of the Oconee tornado/high energy line break mitigation strategies and regulatory commitments. The revisions included a delay in completing the tornado missile risk analysis, delays in the scheduled licensing and implementation of fiber-reinforced polymer for tornado mitigation, and new commitments by Duke to install Main Steam Isolation Valves. On February 1, 2008, senior management from NRR, Divisions of Engineering and Operating Reactor Licensing, visited the Oconee site to observe Duke's progress in implementing tornado and high energy line break mitigation strategies.

Snubber Users' Group (SNUG) Meeting

On January 28-29, 2008, the staff attended a SNUG meeting in Myrtle Beach, South Carolina. The meeting was also attended by various nuclear industry owners and their representatives, and dynamic pipe restraint (snubber) suppliers. The owners' group discussed current issues related to in-service examination and testing of snubbers and potential changes involved with switching from the American Society of Mechanical Engineers (ASME) Boiler and Pressure Vessel Code, Section XI, to the ASME Code for Operation and Maintenance of Nuclear Power Plants (OM Code) as the code of record for snubber programs. Some utility attendees presented reports on their snubber program health, as well as discussions of snubber-related operating experience.

Susquehanna Steam Electric Station Units 1 and 2 Extended Power Uprate (EPU)

On January 30, 2008, the NRC approved an increase in the maximum steady-state power level at Susquehanna Steam Electric Station 1 and 2 from 3489 megawatts thermal (MWt) to 3952 MWt, which is an approximately 13-percent increase in thermal power over the previous licensed thermal power and a 20-percent total increase over the original licensed thermal power (3293 MWt). The application from PPL Susquehanna, LLC (the licensee) was submitted on October 11, 2006. The staff issued its letter accepting the application for staff review on January 5, 2007. The NRC staff determined that the licensee could safely increase the reactor's output primarily by changing the core design and upgrading certain balance of plant capacity components, such as replacing the steam dryers, high-pressure turbines, and selected feedwater turbines. The power uprate will increase each unit's generating capacity by approximately 100 megawatts electric.

Meeting of the Digital Instrumentation and Control Steering Committee

On February 1, 2008, a public meeting of the Digital Instrumentation and Control Steering Committee was held to discuss the Digital Instrumentation and Control Project Plan. Participants in this meeting included the NRC offices of NRR, Nuclear Regulatory Research (RES), New Reactors (NRO), Nuclear Material Safety and Safeguards (NMSS), and Nuclear Security Incident Response, and the Nuclear Energy Institute (NEI). The Steering Committee

discussed recent and upcoming activities including the development of Interim Staff Guidance for Cyber Security, Risk Informing, Human Factors, Licensing Process, and Fuel Cycle Facilities as well as the draft revision to the project plan. The next public meeting of the steering committee is planned for March 2008.

Meeting of Task Working Group 3 of the Digital Instrumentation and Control Project

On February 8, 2008, a public meeting of the Digital Instrumentation and Control Task Working Group 3 was held to discuss current Digital Instrumentation and Control issues relevant to Risk-Informing the Digital I&C System. Participants included the NRC offices of NRR, RES, NRO, and NMSS, NEI, and members of the Nuclear Power Industry. Discussions during the meeting focused on the Draft Interim Staff Guidance and Risk Insights.

February 8, 2008

ENCLOSURE A

Office of New Reactors (NRO)
Items of Interest
Week Ending February 8, 2008

Receipt of Letter of Intent from Transition Power Development, LLC

By letter dated January 30, 2008, Transition Power Development, LLC notified the NRC of its intent to submit an early site permit application and/or a combined license (COL) application for two nuclear units by April 2010. The applicant indicated that the two units will be part of the Blue Castle Generation Project, to be located in East-Central Utah.

Receipt of Letter of Intent from Unannounced Applicant Regarding Submittal of a COL Application

By letter dated January 31, 2008, an unannounced applicant notified the NRC of its intent to submit a COL application during the first quarter of 2010. The applicant indicated that it intends to finalize the technology selection by fourth quarter 2008. The applicant's letter contains proprietary information and was submitted under 10 CFR 2.390.

Luminant Revises Submittal Date for COL Application

By letter dated February 4, 2008, Luminant Generation Company notified the staff of its change in submittal date of the COL application for Comanche Peak Nuclear Power Plant, Units 3 and 4, from July 2008 to September 2008. The change resulted from a re-assessment of the COL application preparation activities in light of the lessons learned from the U.S. Advanced Pressurized Water Reactor Design Certification application and from recently submitted COL applications.

Staff Holds Public Scoping Meeting to Discuss Environmental Issues Pertaining to the COL for South Texas Project (STP) Combined License Site

On February 5, 2008, the NRC staff conducted two public meetings related to the COL application for the STP COL site in Bay City, Texas. The purpose of these meetings was to solicit comments from the public to help identify significant environmental issues related to the COL and provide the opportunity to interested members of the public to submit comments or suggestions on these environmental issues and the proposed scope of the staff's environmental review. Approximately 250 people attended the afternoon meeting and 160 people attended the evening meeting, including representatives of the NRC staff, Pacific Northwest National Laboratory, STP, state and local governments, and the nuclear industry, as well as members of the public. The public comment period for scoping ends on February 18, 2008. At the conclusion of the comment period, the staff will evaluate the comments received, develop the scope of the draft environmental impact statement (EIS), and prepare the draft EIS. The schedule for the draft EIS will be determined once the NRC receives missing information from the applicant.

Office of Nuclear Material Safety and Safeguards (NMSS)
Items of Interest
Week Ending February 8, 2008

January Meeting of American Society for Testing and Materials

From January 27 to 31, 2008, through teleconference, NRC and Center for Nuclear Waste Regulatory Analyses (CNWRA) staff, participated in the American Society for Testing and Materials Subcommittee Meeting, held in Tampa, Florida. NRC and CNWRA staff: (1) provided guidance on potential high-level waste neutron absorber materials; (2) presented a paper on the corrosion of high-level waste packages; and (3) discussed related issues in high-level waste management.

U.S. - Japan International Atomic Energy Agency Safeguards Consultations

On January 30, 2008, Division of Fuel Cycle Safety and Safeguards staff participated in the U.S. - Japan International Atomic Energy Agency (IAEA) Safeguards Consultations, held in Tokyo, Japan. These meetings are continuing discussions with the Japanese to ensure that the IAEA Safeguards approach for the Japan Nuclear Fuel, Ltd. Mixed-Oxide Fuel Fabrication Plant and the Japan Nuclear Cycle Development Institute complies with the safeguards concepts contained in the U.S. - Japan Nuclear Cooperation Agreement. Additionally, staff from NRC, U.S. Department of Security, and U.S. Department of Energy (DOE) informed the Japanese Safeguards Office and Japan's Ministry of Education, Culture, Sports, Science and Technology of the status of IAEA Safeguards activities within the U.S. This meeting included a briefing on future uranium enrichment plans in the U.S.

Presentation to the Tank Waste Committee of the Hanford Advisory Board

On February 6, 2008, Division of Fuel Cycle Safety and Safeguards staff made a presentation on the NRC's role in the review of the DOE regulatory processes for the Hanford Waste Treatment Plant. This public presentation was made to the Tank Waste Committee of the Hanford Advisory Board in conjunction with a site visit to the DOE Waste Treatment Plant.

Office of Federal and State Materials and Environmental Management Programs (FSME)
Items of Interest
Week Ending February 8, 2008

Chairman and Congressional Staffer Visit Local Materials Licensees

On February 4, 2008, the Chairman and NRC staff from the Office of Congressional Affairs, FSME, and Region I, and a Congressional staff member from the Department of Homeland Security (DHS) Committee visited George Washington University and District Hospital Partners, L.P. (George Washington University Hospital). The visits focused on the uses of irradiators for research and medical care, and the licensees' views and experience with radioactive materials security requirements including increased controls and fingerprinting.

Fingerprinting Workshop Held for Licensees

On February 5, 2008, at the Region III offices, the staff held the first in a series of five fingerprinting workshops for licensees in reference to Order EA-07-305 "Order Imposing Fingerprinting and Criminal History Records Check Requirements for Unescorted Access to Certain Radioactive Material" issued by NRC on December 5, 2007. These workshops are being conducted to facilitate licensee implementation of the new requirements.

Staff Conducts Vendor Visits to Sealed Source and Device Product Manufacturers

On February 7-8, 2008, FSME conducted another in a series of vendor visits to the manufacturers of sealed source and device (SSD) products. The initiative complements security initiatives being conducted by other agencies, such as that of DHS and the U.S. Department of Energy. The team comprised of NRC staff and Agreement State SSD experts visited CIS-US Inc., one of three major suppliers of irradiators, and QSA Global.

Office of Nuclear Regulatory Research (RES)
Items of Interest
Week Ending February 8, 2008

Public Meeting on Generic Issue 199, "Implications of Updated Probabilistic Seismic Hazard Estimates in Central and Eastern United States on Existing Plants"

On February 6, RES held a public meeting with stakeholders on Generic Issue 199, "Implications of Updated Probabilistic Seismic Hazard Estimates in Central and Eastern United States on Existing Plants." The industry, under the leadership of the Nuclear Energy Institute and the Electric Power Research Institute, will work with the staff to perform the Safety/Risk Assessment Stage of the Generic Issues Program. Additional public meetings are tentatively planned for March and May to exchange technical information on seismic and plant information and risk analysis methodology.

The Infrastructure Security Partnership

On February 7, the NRC attended a workshop entitled, "Security During Construction of Critical Infrastructure" sponsored by The Infrastructure Security Partnership (TISP). TISP is a public-private partnership promoting collaboration to improve the resilience of critical infrastructure against adverse impacts of natural and man-made disasters.

Transportation Security

On February 13, the NRC met with the Department of Homeland Security's Transportation Security Administration's (TSA) Hazardous Materials Security Branch. The meeting discussion focused on NRC's plans regarding transportation security of radioactive materials quantities of concern (RAMQC).

ENCLOSURE J

Office of Public Affairs (OPA)
Items of Interest
Week Ending February 8, 2008

OPA Received Significant Media Inquiries on the following:

Energy Solutions of Utah request for import/export licensing related to low-level waste from Italy.

Update on the license renewal review for the Vermont Yankee nuclear plant.

Oyster Creek nuclear plant's license renewal application.

Indian Point nuclear plants recent Component Design Basis Inspection.

Potassium iodide beyond the 10-mile emergency planning zone.

Special Inspection team review of the Global Nuclear Fuel facility near Wilmington, North Carolina.

Other Public Affairs Items:

OPA setup a press conference for Chairman Klein after touring the Peach Bottom nuclear plant with Senator Carper (D-Del.) and Congressman Platts (R-Pa.).

OPA arranged a media briefing of NRC's FY09 budget with CFO, Bill McCabe and Les Barnett.
