comments: This comment is submitted in opposition to the proposed plan by EnergySolutions to import approximately 20,000 tons of nuclear waste from Italy to the U.S. for processing. We have not dealt adequately with disposing of our own nuclear waste. There is absolutely no possible justification for allowing this company to import more waste other than their desire to make money. This is not adequate justification for adding to our national problem. Being a Utah resident, I am particularly troubled by this plan. We already have a nuclear tailings pile at Moab, Utah, the clean up of which has been extended/delayed again. If EnergySolutions wants to clean something up and be a good corporate citizen of Utah, let them start in their own state not bring more here! This is absolutely unbelievable. Please protect Utahns and U.S. citizens from ideas such as this.
