Subject: Italy's nuclear waste/Energy Solutions bad solution

122

To the Rulemaking and Adjudication Staff,

Please do not have the United States as a dumping ground for the world. Each country should be in charge of their own waste material. To make money on this radioactive waste is a greedy low that Energy Solutions is all about. I treasure and take pride in our state of Utah. This is something that Energy Solutions does not.

We object to this licensing request and ask that you do so also.

Thank you for your time.
