U.S. Nuclear Regulatory Commission
Washington D.C. 20555-0001

February 11, 2008

DOCKETED
USNRC

Attention: Rulemaking and Adjudication Staff

February 20, 2008 (3:20pm)

Sirs:

OFFICE OF SECRETARY
RULEMAKINGS AND
ADJUDICATIONS STAFF

We are concerned and disturbed about the consideration being given to the Energy Solution's application to receive low grade nuclear waste from foreign countries, namely: Italy, in addition to nuclear waste from around our own country.

We do not understand why this matter is even being considered by our Public Officials. If these proposals are accepted, we will be inundated by nuclear waste from the whole world!

Why would anybody in their right mind even give this a second thought? It is our position that nuclear waste should be disposed of where it is generated and not sent to Utah for disposal.

We hope our Public Officials will recognize what is happening to our beautiful state and prevent any further consideration of granting a permit and let the generators find other means of taking care of their own nuclear waste problems. Let Energy Solutions go elsewhere to make their financial gains. We have many friends and associates who share this same attitude.

Respectfully,

Donald H. & Gerri S. Davis

Two concerned citizens,
Donald H. and Gerri S. Davis
