Washington, D.C. 20555-0001  
Attn: Rulemaking and Adjudication Staff

Dear Sirs/Madames,

I'm writing about the proposal for Energy Solutions Inc to import radioactive waste from Italy.

If allowed to happen, this would set a dangerous precedent by granting a high-volume import license for all of Europe to take advantage of. In essence, the United States is asking to be a dumping ground for the world. The Energy Solutions facility at Clive will soon be the sole repository for waste from 36 states. Why are we willing to allow the facility to be filled up by other countries.

Energy Solutions Inc will get it's almighty dollar. The space is needed... but the needs of our country should come first.

I urge you to stop Energy Solution's plan.

Please prevent Utah from becoming the world's radioactive waste dump.

Signed, *Max Gannon*
