Re: Nuclear Waste

We are writing to express our outrage that there is even consideration being given to allow nuclear waste from other countries to be transported and stored in the United States of America. We do not want our country or our state to become ^{the} waste dump for the world. If a country generates and benefits from nuclear power, it must be responsible for the waste generated by that production and not pass it off to any other country. Do not allow the few to enrich themselves at the possible peril of the many. Do not allow nuclear waste from Italy or any other country to be imported into the US, now or in the future.
