OFFICE OF SECRETARY
RULEMAKINGS AND
ADJUDICATIONS STAFF

Dear NRC Rulemaking and Adjudication Staff:

I am writing to register my extreme objection to approving EnergySolutions' application for importing nuclear waste for storage in Utah (or anywhere else). Finding storage for this most toxic and long-lasting of waste products is going to become a nearly insurmountable problem in the future (as indeed it is already). This plan is good for no one except EnergySolutions and European countries too smart to want to store their waste themselves.

Please do not risk the shipping of additional radioactive waste and the need to find more places to put it. I firmly believe that no country should produce more than it can safely dispose of within its boundaries. I would hope that this would lead to a decrease in this alarming source of power which could affect the health and safety of hundreds of generations.

Thank you for considering my remarks and concerns.

Sincerely,

Rebecca Hickox
