Secretary, U.S. Nuclear Regulatory Commission
Washington, D>C> 20555-0001
Rule Making and Adjudication Staff

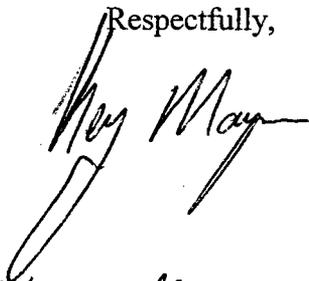

I am writing to voice my objection and concerns about the shipping and storing of nuclear waste in my home state of Utah. Especially nuclear waste from other countries such as Italy, Germany, Belgium, Canada etc.

There are many reasons why this is objectionable to all of us in the Western U.S. First of all the big question, why should we be willing to accept the associated dangers of shipping, processing and storing this hazardous material from other lands? This is absolutely insane. Who is responsible for this unacceptable solution to other people's problems?

We have suffered the results of the atomic bomb detonations of the 50s and 60s with the loss of many loved ones to cancer. We were assured by our government of our safety at that time. We're now faced with the pollution from three coal-fired power plants 30 miles downwind from Southern Utah in Western Nevada, proposed to be built soon.

As a resident of the state of Utah I would like my voice to be heard, and I would like the names of the people responsible for these inappropriate decisions made without our input.

Respectfully,

Ken Mangum
