OFFICE OF SECRETARY  
RULEMAKINGS AND  
ADJUDICATIONS STAFF

Dear Commissioners -

I am a native of Salt Lake City, Utah and current resident. I am deeply concerned that a private company wishes to import up to 20,000 tons of radioactive waste from Italy to be put into the ground downwind of the major metropolitan areas of Salt Lake and surrounding cities. This is a VERY DANGEROUS PRECEDENT and one that should not be allowed. There is currently a growing problem finding adequate and safe disposal of our own U.S. generated nuclear waste. Any disposal site in the U.S. should ONLY be use for domestically generated harmful and radioactive waste.

EnergySolutions states in its application that "the sources of this material are not fully known" and that some of the waste may be above allowable contamination for processing and disposal in Utah. The Commission should not agree to allow this import when the nature and hazards of this material remain unclear. There is far too much that is un-known, un-verifiable, and presenting very real and grave dangers and consequences to allow this request by Energy Polutions to be apporved. I strongly urge you as a deeply concerned citizen of Utah and the United States to STRONGLY AND PERMANENTLY REJECT this proposal and application.

Thank you for taking comments and doing your jobs to protect the homeland and your fellow citizens and countrymen women and children.

Best regards, Camron Carpenter
