Jim,

As I mentioned to you last week, Bruce had some followup questions on the comments that you sent in on the DEIS. Below are the questions. Please make sure to get me a response soon so that Bruce can update his SER input and we can get moving on development of the FSER. Oh and I hate to do this but I need this in a letter so that it is on the docket. Thanks.

Christian

RAI 13.3-(1): Section 13.3.1.1, "Site Description," of the ESP application SSAR states that "[t]he area near the site is lowlands and is not used for commercial or industrial purposes." Item 13 of Enclosure 1 to SNC's December 26, 2007, letter (AR-07-2216) states that "[a]n 800-cow commercial dairy is being constructed within 10 miles of VEGP." Please identify the location of the commercial dairy, including its distance from the VEGP site, and describe any impact it has on the evacuation time estimate (ETE) described in Appendix 6 of the Emergency Plan (SSAR Part 5).

RAI 13.3-(2): ESP application (Part 5, "Emergency Plan") Section B.1, "Normal Plant Organization," states that "approximately 650 people will be stationed at Units 3 and 4 during the standard workday." Item 18 of Enclosure 1 to SNC's December 26, 2007, letter (AR-07-2216) states that "[t]he original estimate of 660 full time workers to support the Vogtle units contained in the ER is believed by SNC to be low. At this time, SNC estimates for training and other purposes that the number of full time workers will be 812. This number will continue to be refined up until the time the units are actually operational." Please confirm that the 812 full time workers are associated with Units 3 and 4, and describe any impact this increase in VEGP site population has on the evacuation time estimate (ETE) described in Appendix 6 of the Emergency Plan (SSAR Part 5).
