Bob,

Out initial review of the first set of Final Status Surveys (FSSs) looks good. I do have a couple of requests.

Since my HP, Tom Youngblood, is new to Rancho he asked where are the sample data and calculations that support the gross activity DCGLs used in these surveys. We may already have that info or it may be on site but I did not know where to direct him.

Also, since we will have to address the as left doses for purposes of the EPA MOU, could you start a spreadsheet to compile the actual or as-left average doses for the survey units on site based on your survey info.

Thanks,  
John
