Proprietary Notice

This letter forwards proprietary information in accordance with 10CFR2.390. Upon the removal of Enclosure 1, the balance of this letter may be considered non-proprietary.

MFN 07-635
Revision 1

Docket No. 52-010

March 3, 2008

U.S. Nuclear Regulatory Commission
Document Control Desk
Washington, D.C. 20555-0001

Subject: Resubmittal of Licensing Topical Report NEDE-33259P, Revision 1, "ESBWR Reactor Internals Flow Induced Vibration Program," December 2007

The purpose of this letter is to resubmit GE Hitachi Nuclear Energy (GEH) Licensing Topical Report (LTR) NEDE-33259P, Revision 1, "ESBWR Reactor Internals Flow Induced Vibration Program," dated December 2007 (Enclosure 1). This submittal replaces the report previously transmitted via Reference 1 in its entirety. The header in LTR NEDE-33259P, Revision 1, which was transmitted to the NRC on December 7, 2007, showed the report number to be "33269," while it should have indicated "33259." The correction is a typographical error only, and there are no changes in the technical content of the report.

Enclosure 1 contains GEH proprietary information as defined by 10 CFR 2.390. GEH customarily maintains this information in confidence and withholds it from public disclosure. Enclosure 2 is the non-proprietary version, which does not contain proprietary information and is suitable for public disclosure.

The affidavit contained in Enclosure 3 identifies that the information contained in Enclosure 1 has been handled and classified as proprietary to GEH. GEH hereby requests that the information in Enclosure 1 be withheld from public disclosure in accordance with the provisions of 10 CFR 2.390 and 9.17.
