Re: License number 50-29269-01

Greetings:

I am requesting an expedited modification of my license substituting a Humboldt Scientific Compaction Control Gauge (model 5001) to measure the moisture content and density of material, from the CPN model 131 as stated on my license.

Quantities for the Humboldt Scientific Gauge:

<u>Radioactive Material</u>	<u>Chemical/Physical form</u>	<u>Maximum Amount</u>
Cesium-137	Sealed Sources Humboldt 2200064	Not to exceed 11 millicuries Per Source
Americium-241:Be	Sealed Sources Humboldt 2200067	Not to exceed 44 millicuries Per Source

I hope you will expedite this modification of license because 3 weeks are required for delivery.

Thank you,

  
John D. Squires

*Spoke with RSO John Squires on 3/6/08 and he stated he never bought a CPN gauge. Furthermore, he was inspected by Richard Leonardi the week before.*
