**Subject:** see below

Attention: Rulemaking and Adjudication. Reference Energy Solutions Import License Application IW023

I request that this application be denied. The TN Department of Environment and Conservation argues that such low level nuclear waste is harmless. If that is the case then there is no reason why Italy should not process its own nuclear waste. This alone is sufficient reason for denial:

Of course I do not accept the position of TNDEC. I cite as my authority the report entitled "Out of Control - On Purpose" by the Nuclear Information and Resource Service, Maya 14, 2007, Takoma Park, MD. This report makes it very clear that all nuclear waste is harmful to some degree. I believe this to be true. So this is the real reason why I think that this application should be denied. TN does not need to be involved with the importation of 20,000 tons of nuclear waste from Italy. Let them take care of their own nuclear waste.
