OFFICE OF SECRETARY
RULEMAKINGS AND
ADJUDICATIONS STAFF

EnergySolutions
Docket No. 110057

Subject: EnergySolutions' license application to import Italian waste.

As an employee working at the EnergySolutions Bear Creek facility in Oak Ridge, Tennessee, I am writing in strong support of the import license application. We have safely processed foreign materials at Bear Creek for at least the last 12 years. In fact, we are currently processing material from Canada that is very similar to the material we would process from Italy.

EnergySolutions' record of the safe handling of waste materials, meeting applicable license requirement, regulation, and state and federal law demonstrates its absolute commitment to environmental safety. The Bear Creek facility has received the National Safety Council's Perfect Record Award and is in the process of obtaining the Tennessee OSHA Voluntary Protection Programs Star status. I have no doubt in my mind that if the Commission grants the license application, EnergySolutions will continue meeting its high safety standards.

I firmly believe that the record of accomplishments, that have been established by the EnergySolutions Bear Creek facility team of management and employees, working together, is one that supports our corporate goals, and proves without question that people really do make the difference. It is people, who are the employees of EnergySolutions, and those employees are the ones who perform the material processing on a daily basis. We know what we do, is an important part of the nuclear industry, and we take pride in knowing we are making a contribution to that industry, through the safe and effective disposition of nuclear waste products. I am proud to say that I am a member of this team.

I strongly urge the Commission to approve the license request.

Sincerely,
Christopher A. Thurman
