Subject: Importation of Radioactive Waste

Dear NRC,

I am writing to express my deepest concerns and opposition to the importation of radioactive wastes. I am writing to ask you to refuse licenses to the company Energy Solutions or any others wishing to import such hazardous wastes. The applications for license I am referring to are Numbers IW023 and XW013, Federal Register Volume 73, Number 23, of 2/11/08. This is a Pandora's Box that should never be opened. This country has not properly addressed it's own radioactive waste issues. It is my right as a citizen of this country to expect that Commissions set up for my benefit and protection do just that. It is also the duty of every individual to preserve and protect the world that sustains us. We must take care of our own wastes safely and responsibly and not import from others or export to others any of our own wastes. The use of fossil fuels in the process of importing and exporting wastes is an additional issue. Because I care about the planet, I am trying to eat and buy locally to cut down on carbon emissions from the transportation industry. The importing of toxic wastes places risks to those who transport it as well as to the environmental path it takes in transport, involving a great distance. This is a risk to the environment and its inhabitants that no company should be granted license to incur. We must do all in we can to protect our planet which is already in great peril.
