March 4, 2008 RE: Comment re Application IW023

Dear Secretary,

I write in strong opposition to the application of EnergySolutions to bring radioactive waste into the U.S. for reprocessing.

This application is so harebrained it defies comprehension. As of this time, after half a century and billions of dollars of American taxpayer money, there exists no good solution to the disposal problem of America's existing in-nation nuclear waste. Now the industry wants not only to create more high level waste, but bring additional radioactively hazardous material into the country. For what? So EnergySolutions can reap huge profits?

Some sanity must exist in the NRC. This application must be denied.

Respectfully,

Michel Lee, Esq.

Chairman
Council on Intelligent Energy
& Conservation Policy
White Plains, New York
