Subject: Please Keep Nuclear Waste Out of Utah

To Whom It May Concern:

Please do not allow this nuclear waste to come to Utah. The public will not benefit from this in any way. Monetary gains cannot substitute for loss of health and possibly even life from having this toxic waste so close. I cannot even consider the horrific events that would follow to the residents of this state if this waste was to leak into the ground water. The effects would be devastating and would be a detriment for generations. I love this great state and it is not a dumping ground no matter how much money is offered. This is a case of the value of human life and there is no price that can justify the introduction of deadly materials into our ecosystem. Another very real danger is the proximity to the Wasatch Fault. Anything can happen in the case of an earthquake and I am not willing to take that risk for myself or for my children.

Utah has already suffered enough. We were the recipients of a radioactive cloud (though at the time we were reassured that it was harmless) that has been the cause of cancers and untimely deaths. Is my generation to become the next "down winders?" I know that I am just one in millions of people but I have a voice and I will use it against corporations that put a bottom line above the health and welfare of human beings. I deserve to live in a state that is free of international nuclear waste. Please keep this malignant refuse out of Utah and out of this great country. Thank you for your time and consideration. If you keep Utah free of this filth, future generations may thank you as well.
