Subject: Please Deny EnergySolutions' Import Application (IW023) submission

Insert personal comments here : Dear Office of the Secretary and Gov. Huntsman,

I am writing to urge the Nuclear Regulatory Commission to deny EnergySolutions' request to import 20,000 tons of Italian nuclear waste into the U.S. It is my understanding that this single request is many times larger than previous import licenses granted by the Commission and would therefore represent a serious departure in this country's policies for handling nuclear waste.

Granting this request would set a dangerous precedent for the U.S. to become the world's nuclear waste repository at a time when our own low-level waste disposal capacity remains uncertain. Filling up our domestic resources for low-level waste disposal with another country's nuclear waste will put considerable pressure on existing U.S. disposal sites to expand and create a need for new sites to open up. The emergence of new and larger low-level nuclear waste sites due to foreign waste disposal constitutes an unreasonable risk to public health and safety. Having to safeguard these sites from terrorist attacks or other acts of intrusion will put considerable strain on our national defense and security. Furthermore, the transportation of this waste into our ports and through our cities and towns presents an unacceptable risk to our health, safety, and security.

EnergySolutions states in its application that "the sources of this material are not fully known" and that some of the waste may be above allowable contamination for processing and disposal in Utah. The Commission should not agree to allow this import when the nature and hazards of this material remain unclear.

I love Utah and want to live out my life here, but not at the threat of nuclear waste issues. Nuclear waste poses too many uncertain health risks that I am not willing to live with nor do I want any of ally my extended family and friends to have to live with. I am only 26 years old and would some day love to have a family here in Salt Lake, but would not do as such risking the health of my future children to grow up next to nuclear waste. I do not wish any disease or health or birth anomalies upon your family so do not wish them upon mine as we both, among many, live in Salt Lake City, Utah too.

Because of the concerns stated above, I strongly urge the Commission to reject the application submitted by EnergySolutions.
