Subject: Nuclear Waste to Utah

To Whom It May Concern:

I am writing about a recent issue that was discussed on our local news. It was about nuclear waste coming to the state of Utah from Italy and other parts of the world, to be disposed of the company Energy Solutions. I am totally against such an action, and hope that nuclear waste is never allowed to come to my beautiful state. It sickens me that people would even think of having such material come here. What is wrong with that company, Energy Solutions! Why would they think that we would want such material here. They need to be given a wake-up call, letting them know that no one wants their company here, let alone the horrific material they think they can deal with. They are the evil that we all hate.

I do not want my beautiful state to become the dumping ground for the world with such harmful and dangerous material. How could Energy Solutions even think that it is okay to have such horrible waste material come here. I am appalled and outraged at such careless and inconsiderate actions on the part of this obnoxious and toxic company.

Please do not allow this material, or any such material, to ever come here to our wonderful state of Utah, or to the United States of America for that matter. We must respect our land and our heritage. Please do not allow our proud and beautiful country to be the nuclear waste-ground for the world. Please send the message to the world that we do not want their toxic, dangerous and highly contaminated material coming here. Say no to Energy Solutions, now and forever. We must stop the madness now.

Thank you,
Sincerely,
Concerned Citizen and Resident
