comments: I understand that the regulations allow this to happen but I wish to be counted as 100% against the importation of nuclear waste in any way. If domestic waste processors want to decommission foreign nuclear plants then the material needs to stay in country of Origin.

It's obvious to me that nuclear power, while a nice idea, is not practical for the longevity of the human genome and any country that's wants to use it should deal with their own waste.

Do we really want to be the worlds land fill? Please respond with proof it went to the right people. Thanks
