**Subject:** NO!!! to License Applications IW023 and XW013

As a 36-year resident of the State of Tennessee and a concerned citizen of this planet, I am writing to express my opposition to the Nuclear Regulatory Commission's permitting License Application IW023 and XW013 (Federal Register Volume 73, Number 28, 2/11/08). This License would allow a private company-- EnergySolutions--to import 20,000 tons of international radioactive waste into the US/Tennessee for processing including incineration, 'recycling', transport and disposal.

Since the Federal government is having a difficult time determining what to do with our own American-generated radioactive waste why would we want to import more from other countries! Those countries--or even other states within the United States--that wish to turn to 'nuclear solutions' to meet their energy needs should also be prepared to **accept the responsibility** of dealing with the dangerous, problematic radioactive end product. That should be an important, commonsense aspect of making that decision in the first place!

The State of Tennessee should NOT be considered a dumping ground/or processing stage for radioactive waste. The health and environmental welfare of our State and its citizens should NOT be placed in jeopardy for the financial gain of any coporation.
