**Subject:** nuclear waste

When I first moved to Utah from Illinois in 1990 I was amazed at how many people here had MS. I was in my late 50's then and had never met anyone with this illness. Suddenly I knew at least three or four. When I would comment on it I was told it was my imagination. Well years later I find out that yes there is a high incidence of MS here and it probably can be attributed to the bomb tests on the Nevada desert. There is also a very high incidence of cancer due to the same tests.

Now they want to bring in more waste and those responsible should be ashamed to put this state at more risk. If the world wants to have nuclear power and has the expertise to do it then they should also have the expertise to handle their own waste. I believe that should go for all of the states here in the U.S. too. Utah does not have one nuclear power plant but we get the waste due to the greediness of one company that would be happy to take anything as long as they make money on it. Well, lets put a stop to it now. I am 73 and it will probably never be a problem to me but for the children coming after it will be.

Please do not allow the waste from foreign countries to be brought to the U.S. and do not let the state of Utah be the dumping ground for the rest of this country.

Sincerely, Lois Stawitcke      [iluvbears@infowest.com](mailto:iluvbears@infowest.com)
