Chris/Gary

You will find attached to this email a file that compares the **VY SER with hole** I provide the ACRS in December to the **VY SER with hole** plus edits up February 08. This file should allow the members to recognize changes to the parts of the SER previously reviewed to assure nothing has been technically changed. They will find that the vast majority are editorial in nature. Minimal changes of a technical nature may be found in areas involved in the contentions, Flow Accelerated Corrosion program and Steam dryer.

Remember that Section 4.3.3 in its entirety was delivered in a separate email.
